Inline Axial Fans
Airline and Airline LED

Models: AI100, AI100T, AII100, AII100T

Clearing excess steam in the bathroom is no longer a problem with the Xpelair Airline range and its perfectly optimised impeller design.

It gives high level performance and meets Building Regulations Part F - even when installed with ducting and an external grille.
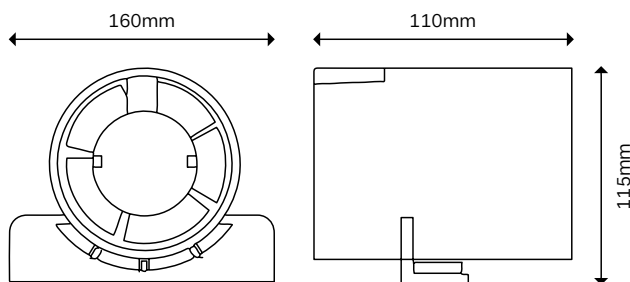

The Airline system has the additional benefit of being installed up and out of the splashzone in the loft, helping to keep noise levels to a minimum. All fans in the range come complete with a loft fitting kit, giving eveything needed to complete the install.

The Airline LED products come complete with a Cool White LED light and SELV transformer.
