

AirLine & AirLine LED

Inline axial extract fan systems for shower cubicles

Domestic

Clearing excess steam in the bathroom is no longer a problem with the Xpelair Airline and its perfectly optimised impeller design. It gives you high-level performance and meets Building Regulations Part F – even when installed with ducting and an external grille. The AirLine system also has the benefit of being installed up and out of the splash zone in the loft, helping to keep noise levels to a minimum.
